Responsible Use Guidelines

As a member of the Westminster School, I understand that I am responsible for how I conduct myself in the digital realm just as I am responsible for my physical interactions. I understand that I am expected to read and understand Westminster’s Acceptable Use policy.

While on school time, I will pledge to:

- show respect for all other users in my digital communications
- give primacy to personal interactions as opposed to digital communications
- protect the privacy of my and other digital information (email addresses, cell phone numbers, passwords)
- provide acknowledgement for other’s ideas or words when I use them
- use technology during classes and mandatory study halls only for academic purposes
- report inappropriate use of technology immediately

An adherence to these principles, by students and faculty, will maintain a healthy, productive atmosphere in the school community.
